

Secure

APF Firewall starte nach Kernelupdate nicht mehr. (Unable to load iptables module (ipt_state), aborting)

Edit: /etc/apf/internals/functions.apf

Replace these lines:

```
ml ipt_state 1  
ml ipt_multiport 1
```

with these lines:

```
ml xt_state  
ml xt_multiport
```

Eindeutige ID: #1041
